23. Base Ball Game, 3:00 P. M., at Lincoln Field.	Round Grip, Richardson Bros.	25 cents Cash.

## The Counties.

### Jackson County.

**Drip Rock.**  
Miss Susie Parsons, of Berea, is visiting in this vicinity.  
Mrs. Hustin Huff has been very ill, but is now improving.  
Mrs. Minerva Green, of Bell county is visiting friends and relatives here.  
Joan Wagers has purchased the store on Warfork from Wood & Wood.  
Rev. J. W. Parsons has been called as pastor of the Baptist church of this place. Preaching services will be held the first Saturday and Sunday of each month.

### Clay County.

**Ogle.**  
A boy was born to Mr. and Mrs. R. Swafford.  
Many of our farmers are behind with their work.  
Wm. Means had a log-rolling Tuesday.  
Joseph Eversole is preparing to enter the goods business.  
Miss G. Freeman has been very sick during the past week.  
T. F. Clark shows his broad smiles in this "neck of the woods" quite frequently.  
Monroe Dawson, the new overseer of the lower Otter Creek road has had the road repaired.  
Washington Davidson, an old citizen who was expected to die, has completely recovered.  
Robert Woods is building a good deal of plank fence near the mouth of Otter Creek.  
Alex Means, who has been for sometime at Rockhold, Tenn., has returned to this place.

### Owsley County.

**Eversole.**  
Mrs. Lottie Wilson is very ill.  
Flora Cawood was in our midst Friday.  
Emma Cole, who has been very ill, is now some better.  
Miss Jaily Gabbard, of Gabbard, vs ted Mrs. Margaret Moore Sunday.  
Mrs. James States, of Wolf Creek, visited her mother last Saturday.  
Samuel Cole and wife are all smiles over the arrival of a new girl.  
Walter Reynolds, of Booneville, visited friends and relatives here last Saturday and Sunday.  
Fine boys were born to Mr. and Mrs. W. N. Duff, and Mr. and Mrs. J. R. Moore.  
Misses Lucy Reynolds and Dora Moore were the guests of Miss Jennie Gabbard Sunday.  
Jerry Reynolds, of Perry county, visited his mother, Mrs. Elisha Reynolds, of this place last week.  
G. B. Reynolds and Miss Rosa Campbell, both of Booneville, were married Wednesday of last week.  
Wm. State and Mrs. Delia Whitaker were married last Friday at the home of the bride's parents by Rev. Sherman Anderson.

## SPECIAL DEPARTMENTS.

### THE HOME.

Edited by MRS. KATE U. PUTNAM, teacher in Berea College.

#### What to Teach a Girl.

Teach her to dress for health and comfort as well as for appearances.  
Teach her how to darn stockings, sew on a button, and mend a glove.  
Teach her to say "No" and stick to it or "Yes" and mean it.  
Teach her to make hers the neatest room in the house.  
Teach her to have nothing to do with intemperance or dissolute young men.  
Teach her to regard the morals and habits, and not money, in selecting her associates.  
Teach her that music, drawing, and painting are real accomplishments in the house, and not to be neglected if there is time and money for their use.  
Teach her that the more she lives within her income the more she will save, and the futher from the alms-house will she live.  
Teach her to embrace every opportunity for reading, and to select such books as will give her the most useful and instructive information, in order to make the best progress in early as well as in later home and school life.

#### Can He Do These Things.

Your eighteen-year-old boy may have a good deal of Latin and cube root, says an exchange, but unless he can do the things enumerated below he is not ordinarily well equipped as a business man or as a man of the world. Can he do them?  
Write a good, legible hand.  
Write a good, sensible letter.  
Speak and write good English.  
Draw an ordinary bank check.  
Take it to the proper place in the bank to get it cashed.  
Add a column of figures rapidly and accurately.  
Make out an ordinary account.  
Write an ordinary promissory note.  
Measure a pile of lumber in your shed.  
Spell all the words he knows how to use.  
Write an advertisement for the local paper.  
Make neat and correct entries in day-book and ledger.  
Tell the number of bushels of wheat in your largest bin and their value at current rates.  
Tell something about the great authors and statesmen of the present day.

### THE FARM.

#### THE COW.

A Class Essay at Berea College by EDWARD P. DUNCAN.

#### The Cow Stable.

(Continued from last week.)

An upright pole fastened near the center of the feeding floor with a ring moving freely upon it, to which is attached a chain extending to snap of the chain or strap around the cow's neck makes a good tie.  
Whitewash is a good disinfectant to use around the barn, but do not use it on the floor. The barn should be supplied with windows admitting light and air. It is preferable to have light admitted to the rear of the cow. The windows should be constructed so as not to admit draughts of air; doors also. Water should be conveniently located in order that the cow may not have to travel long distances for it in inclement weather.

#### How to feed the Cow.

The feeding of the cow, like the raising of a good corn crop depends upon certain well defined principles. Our knowledge has been derived from research of the chemist and animal physiologist on the composition and functions of food and the extent to which they are utilized. Food is necessary to mend the tissues, keep up body heat, furnish growth and force, and to furnish secretions as milk. Scientific feeding consists in supplying food in the right proportions without loss. To feed a cow scientifically one must know the composition and digestibility of feeding stuffs; their proper relations and combinations and effects; the cost of the different feeding stuffs must also be taken into consideration. Cows differ in their tastes and requirements and one must know his cow before he can know how to feed her. To merely feed what is most easily procured as is often done, is quite a wasteful practice.

A cow may be turned on grass as soon as she can get a good bite, but the grain ration should not be diminished until she indicates that she is getting enough grass to replace a part of the grain ration. She should not be allowed to remain long on the grass; only a short time each day when first turned on in the spring.

#### The Pasture.

No better food exists for the milk cow than mixed pasturage, containing an abundance and variety of grasses. A mixture of red-top, timothy, white-clover, and orchard-grass make a good pasture. Care should be exercised and only seeds, free from weed-seed, should be sown, as they injure the flavor of the milk.

The cow may be kept on pasture until two or three hard frosts come, then it is well to gradually change the feed to a grain-ration.

Nothing has ever been produced to equal or compare with Tabler's Buckeye Pile Ointment as a curative and healing application for Piles, Pissures, blind and bleeding, external or internal, and Itching and Bleeding of the Rectum. The relief is immediate and cure infallible. Price, 50 cts. in bottle, tube 75 cts. S. E. Welch, Jr.

### THE SCHOOL.

#### A Story.

Written in five chapters by five different members of Utile Dulce Literary Society.

#### CHAPTER III.

Mrs. Edworth's face lighted up, as this encouraging ray of hope gleamed in the darkness.

She had vainly hoped that the father would relent; that his love would overmaster his anger.

"Mrs. Edworth," said Julia, "I am thinking of a position in Beverton where my friend, Mr. Maywood lives. He always has an assistant book-keeper. My cousin was with him last year and so far this, but wants to leave. I will write Mr. Maywood at once and if he has not yet found a clerk he will, I think, consider any one whom I may recommend."

In a few days the answer came asking that William report at his office within a week.

William had been spending some time with relatives about fifty miles from the college which he had formerly attended. One Saturday afternoon while going out for a stroll with his cousin, he stopped at the little country post-office and was surprised to receive a letter from his mother, as it had been only two days since her long weekly epistle. "Can it be that some one is sick? Or has father decided to let me come home?"

These questions flashed into William's mind. But it was neither of these causes that sent the letter. His mother wrote him of the opening at B.; sent him Mr. Maywood's letter and asked him to go promptly and to make himself needed in the new position.

William found at B. that he could earn a helpful little sum by working five hours and could at the same time take work in one of the best small colleges in the East. He was greatly pleased with his new home and worked as he has never worked before. What money he needed above what he could earn was sent him by his mother, and he found that he could finish his college course here in four years.

During the summer he had a position on the lakes. Time sped rapidly. It was always good to get back to school friends in the fall. But he often longed for the dear old home and a sight of his mother's face. Sister Annie was almost a young lady, and little Gracie—his idol—she would walk the earthly paths no more. At B. the time passed so swiftly that the hours seemed winged.

The college boys were all stirred to a jealous emulation one day by the arrival of the assistant music teacher, a beautiful maiden with blue eyes and flaxen hair. William's head was turned and while he said less than the other boys he won his way quietly into the favor of the lovely creature.

Now the four years are almost gone. The graduating class is a large one. The members are invited to lawn parties, to socials here and parties there. The public exercises of the college begin sometime before commencement, and with all the festivity William has found time to be much in the company of the music teacher.

He found time, too, occasionally, to ask himself what his future could be. When he took an inventory of his powers they seemed very limited on the practical side. He had something of an "education," but "What will he do with it?"

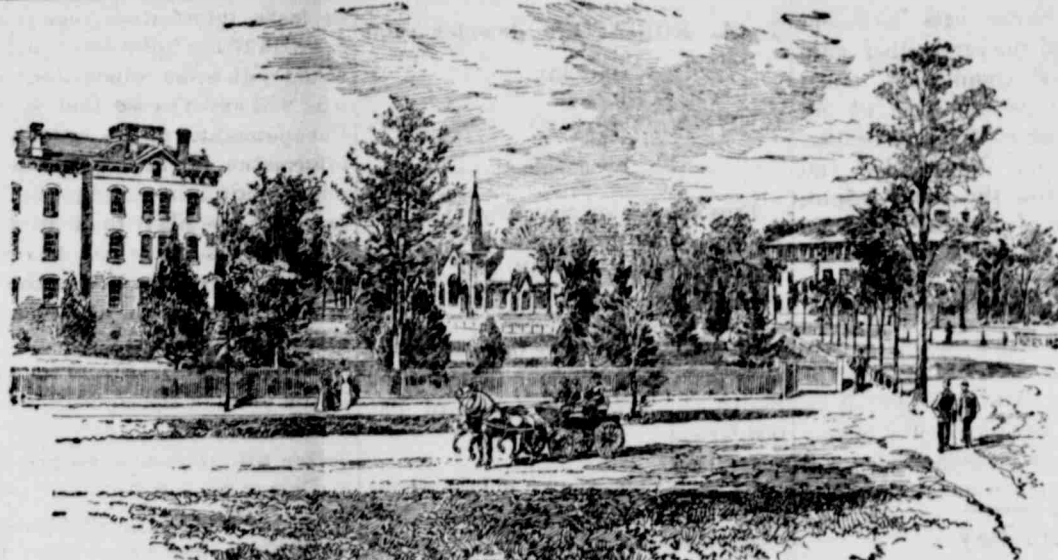

Commencement fell on Thursday this year and, as was the custom, Wednesday was college day. It was there that the seniors came forth in all their glory to show the under class men how things should be done.

Years ago the out-going class had planted an English ivy at the corner of Science Hall and the climbing vine was the symbol of the aspiring class in that it was ever growing, ever climbing and ever reaching out for greater things.

It was not to be expected that each following class should plant a vine, but this class had handed down to the Juniors the spade with which the vine was planted. This spade was no ordinary tool for it had been made specially for the occasion. The lower part was of silver with the class date upon it and with ample space for the dates of coming classes. The handle was of the most exquisitely carved ebony, and it was with much pride that each class received the wonderful spade into its sacred keeping.

It had gone down for years from one class to another without a single break in the order of things, but this year promised a change. The sole and simple reason being that the Juniors hated the Juniors, "Never," exclaimed an excited Senior, "shall the under class possess the spade." Of course when the Juniors heard this they were just as determined to have it as the others were that they should not.

(Continued next week.)

A CHANCE FOR EVERYBODY

BEREA COLLEGE

FOUNDED 1855

Over 20 teachers, 700 students (from 20 states.) Best Library in Kentucky. No Saloons.

### DEPARTMENTS:

- For those NOT sufficiently advanced to get a teacher's certificate:  
I. Trade Schools: Carpentry, Housework, Printing—two years.  
II. Model Schools, preparing for Normal and the advanced courses.  
For those sufficiently advanced to get a teacher's certificate:  
III. Farming and Agriculture, gardening, stock raising, forestry, etc.—two years.  
IV. Domestic Science—Sewing, Cooking, etc.—two years.  
V. Normal Course for teachers—three years, with practice teaching.  
VI. Academy Course—four years, fitting for College, for business, and for life.  
For those more advanced: VII. College Courses—Classical, Philosophical, and Literary.  
Adjunct Departments: VIII. Music—Reed Organ, Choral (free), Vocal, Piano, Theory.  
IX. Berea General Hospital—Two are in the care of the sick.

Berea places the best education in reach of all. It is a money-making institution. Its instruction is a free gift. It aims to help those who value education and to help themselves, and charges a small incidental fee to meet expenses of the school apart from instruction. Expenses for term (12 weeks) may be brought within \$24, about half of which must be paid in advance. The school is endorsed by Baptists, Congregationalists, Disciples, Methodists, Presbyterians, and good people of all denominations. For information or friendly advice address the Vice-President,

GEO. T. FAIRCHILD, LL. D., Berea, Madison Co., Ky.
